

PROLINE ELECTRICAL LIGHT TESTER

THE PROLINE 7 AND 13 PIN TRAILER LIGHTS AND ELECTRICAL TESTER.

The Proline 7 and 13-Pin trailer lights and electrical tester makes testing your lights a simple one-man operation.

The electrical tester is a unique product to AlphaParts, part of the ATE Group, and was developed by our in-house research and development team.

With a one-touch sequence required to operate the tester, the unit includes a reverse light check and the built-in battery pack lasts for around 8 hours.

It comes complete with an adapter and charger, the unit boasts an auto shut-off and now comes with an earth terminal and automatic reset.

One of the key benefits of the Proline Electrics Tester is that it is fully portable, and it is one-man operation, unlike many others on the market which require more than one person to operate.

KEY BENEFITS

The key benefits of our Proline trailer lights and electrical tester are:

- The tester is compatible with both 7 and 13-pin connectors.
- Includes a reverse light check.
- Operates using a one touch sequence test and single check.
- The unit comes complete with a charger and adapter
- Comes with a built-in battery complete with low battery indicator
- Comes with automatic shut-off function
- Comes with an earth terminal and automatic reset which means that if there is an earthing fault, the tester has a resettable fuse.
- Has a maximum output of 24 W.
