

The Double Pointer indicator is an innovation in wheel safety, combining **indicating** and **retaining** in one. Filling the gap in the market for a 5 stud solution, you can rest assured that the Double Pointer will maximise fleet **safety**.

FEATURES

- Easy for drivers to check
- Avoids incorrect positioning methods
- Indicates looseness and retains wheel nuts in place simultaneously
- No tools required for fitting, easy to remove
- Ideal for 5 stud wheel nut configurations
- Viton band links the pointers together to allow a small amount of loosening and safe torque adjustment, which retains nuts in place
